

23-12-13

Exercise of Options

The Company announces that it has received a notice of exercise to issue 91,489 new ordinary shares of 0.25p each in the Company ('Ordinary Shares') at 9.87p per share pursuant to the Company's EMI share option scheme.

Application has been made for the admission of 91,489 new Ordinary Shares to be admitted to trading on AIM and dealings are expected to commence on 3 January 2014. On admission, the Company will have 30,288,184 shares in issue.

Board Changes

Professor J Derek Fairhead, President and Founder, has today announced his resignation as an employee and director of the Company on the occasion of his retirement with effect from 20th December 2013.

In 1986 Professor Fairhead started the business which led to the creation of Getech and he has made a major contribution to its success over many years. The Directors would like to thank Derek on behalf of the Company and its staff and wish him a long, happy and healthy retirement, with success in his future pursuits.

29-10-13

Final Results

Getech Group plc
(“Getech” or the “Company”)
Final Results for the 12 months ended 31 July 2013

Getech, the geoscience services business specialising in the provision of data, studies and services to the oil, gas and mining exploration sectors, announces its Preliminary Results for the year ended 31 July 2013.

Financial highlights

- Revenue for the year increased by 24% to £8,011,250 (2012: £6,441,107)
- Profit before tax increased by 80% to £2,246,496 (2012: £1,246,838)
- Cash level, including fixed term deposits, increased from £3,010,782 to £4,857,927
- Proposed final dividend for the year of 1.6p (2012: 0.8p), a total of 2.0p for the full year (2012: 1.0p)

Operational highlights

- Five further Globe sponsors committed during the year
- Data sales continued to grow from the record level in the prior year
- Major data sales included several global gravity and magnetic datasets
- Cryosat pilot project converted to full scale three-year project with committed funding in excess of £500k
- Next stage in the Globe flagship product launched – Earth Systems Models which include climate, tide and predictive modelling
- Demand for proprietary work strong
- Leeds offices refurbished to provide better working environment and professional image for visitors

Helen Cresswell

Chairman’s statement

I am pleased to make my third report as Chairman of the Company, on the eighth full year results since its admission to AIM, of Getech Group plc and its subsidiary company (“Getech” or “the Group”), for the year ended 31 July 2013. Getech is a geoscience services business specialising in the provision of data, studies and services to the oil, gas and mining exploration sectors.

Results

I report a Group profit before tax of £2,246,496 (2012: £1,246,838) after interest receivable of £30,897 (2012: £6,016) on revenue of £8,011,250 (2012: £6,441,107). The post-tax profit was £1,634,612 (2012: £930,018), giving earnings per share of 5.57p (2012: 3.18p).

Dividends

Getech intends to continue its policy of progressive dividends as appropriate and is proposing a final dividend of 1.6p per share in respect of the year ended 31 July 2013 (2012: 0.8p per share) in addition to the interim dividend of 0.4p per share announced in April 2013.

The final dividend will be paid on 19 December 2013 to shareholders on the register of members on 22 November 2013.

Business review

I am pleased to report for the second year running very strong growth in the performance of the Group following on from the turnaround in 2010–2011. The Group generated a record level of revenue which was an increase of 24% on the previous year. Pre-tax profits increased 80% year on year. Both revenue and profits were again significantly ahead of expectations.

We announced a number of major successes during the year in three key areas.

First, our strategic Globe framework has continued to strengthen and during the year we doubled the number of core sponsors from five to ten. We have also seen a continuing benefit in co-marketing Globe and our traditional gravity and magnetic datasets and proprietary consultancy.

Second, demand for our gravity and magnetic data continued to be very strong and we completed a number of major licence deals for our global gravity and magnetic datasets.

Third, we were very pleased that our commitment to R&D was validated when the Cryosat project, which we had previously announced as a multi-client funded pilot study, was converted to a full global study with commitments from three clients. In addition, a significant number of Getech staff along with key collaborators presented papers at major international conferences, with very positive feedback.

Outlook

The continuing high oil and gas prices (including a significant recovery in the US) have sustained the ongoing strong performance of the oil and gas sector, particularly for exploration and production companies. We continue to believe strong commodity prices are likely to lead to further increased spending from companies in exploration and hence on the services we offer.

We now have a substantial client base for our core Globe framework and have begun delivery of the next stage in its development – the Earth Systems Models. These are attracting significant interest and we anticipate they will make a strong contribution in 2013–14. Further, Globe continues to provide an environment which encourages increased interaction with our clients, which is essential to the longer term benefits. With the increased number of clients the annual Globe workshops in Leeds and Houston have become a major event in the year.

During the year we have also seen the demand for proprietary projects increasing. This is particularly gratifying as we have been increasingly working with smaller companies at geographical scales which are considerably smaller than previously and where there is a more direct link between our work and the development of these companies.

With the requirement for Exploration and Production (E&P) companies to expand into new frontier basins and to minimise cost at the early stages of such exploration, we consider that there will be a continuation of the strong trend in gravity and magnetic data sales. We believe that the combination of our ever increasing library of products and data, and our strong sales presence in the UK and USA, will reinforce the growth path and we are optimistic about the coming years.

In order to grow our business, we are looking for ways to expand into new areas. We are particularly focused on new business streams which build on our key strengths in accessing and marketing data and integrating the data with a broad multidisciplinary geoscience capability to provide real value to our clients.

With our continuing strong cash position and proven ability to develop the business, we continue to actively look for acquisition opportunities, particularly targeting those which will grow our core areas of expertise. The increase in the market capitalisation of the Group has also increased the range of acquisition targets.

Finally, I would like to say how pleased I am to continue to be involved with the Group and to thank the staff and my fellow Directors for all their hard work and dedication.

Dr Stuart Paton

Non-executive Chairman

Operating review

I report that in its eighth year as a public quoted company, Getech Group plc (“Getech” or “the Group”) returned a pre-tax profit of £2,246,496 (2012: £1,246,838) for the year ended 31 July 2013.

Business setting

The exploration market in the oil and gas sector continued to be strong throughout the year. This has been well supported by the continuing firm oil price.

We believe that the relative stability of the oil price at historically high levels will continue to provide a sound market environment for exploration giving a very positive outlook for our business.

Business activities

Getech’s strength lies in its ability to provide a range of data, services and solutions at scales from global to block level. Key to our success is the ability to understand the needs of our clients and provide high quality solutions to help them in their goal of finding oil and gas resources. We have increased our core Globe sponsorship from five to ten clients and have extended the scope of our offering to provide Earth Systems Models (ESM) which take the existing Globe framework to the next level of utility. ESM comprises a suite of climate, tide and, importantly, predictive models. These build on the core Globe framework, particularly our class-leading palaeogeographies, and provide increasing insight into the origin and development of petroleum systems. The first ESM delivery was made in July 2013 and the interest level from our clients gives us confidence that this will build into a very significant extension of Globe.

We have for many years promoted the value of our larger scale “regional” geological understanding as a means of obtaining stronger insights into exploration at much smaller scales. The Globe framework and the higher resolution studies within that framework provide an ideal platform from which to deliver this regional understanding across the world. During the year, we have generated increasing demand for our consultancy services particularly with companies working at smaller geographical scales. This has enabled us to contribute to exploration at block and prospect scales. The levels of client satisfaction provide validation for our view that the regional scale work facilitates improved and valuable understanding at these much smaller scales.

During the year we have extended our relationships with leading universities. Previously we reported we were working with Bristol for climate modelling and Imperial for tide modelling. We have now joined the Basin Structural Group in Leeds. We are also increasing the number and range of commercial associates with whom we work. This provides a highly effective balance of experience, skill and mentoring for our in-house staff and is particularly beneficial in such a tight market for key technical personnel.

In April 2012 we announced that our fully funded Cryosat pilot development project to improve the resolution of satellite data was going ahead. After completion of this project and evaluation of the results, we were very pleased to be able to demonstrate the potential value of our improved methods. We subsequently announced in July 2013 that the pilot would be rolled out to the full global project which is planned to run over three years with confirmed funding in excess of £500,000. This is particularly pleasing as it represents the conversion of the pilot R&D project into a full-scale global study.

This year continued the strong upward trend in revenue and profits. The main reason for this was the growth in our multi-year Globe framework, where income grew by 71% year on year. This was well supported by continued growth in data sales from the record level we achieved in 2011/12.

During the year we made a number of significant individual sales:

- In September 2012 we announced the signature of a call-off contract with total value of €1m and that the first items ordered included part of Globe.
- In October 2012 we announced the signature of two major contracts which included the Globe core sponsorship but also sales of other products, which between them totalled \$2.75m.
- In January 2013, we announced data sales from our global gravity and magnetic datasets amounting to \$1,500k and \$500k respectively.
- In June 2013 we announced a further major sale from these datasets amounting to \$962k.

During the year we have continued to develop and extend Globe, making it increasingly valuable to its sponsors. In October 2013 we had our second year Globe sponsors meetings in Leeds and Houston and these were even more successful than the previous year. The increased number of Globe clients combined with the growing experience of working with Globe, generated a lively and extremely constructive set of discussions and workshops.

During the year we carried out major refurbishment of the offices, providing an improved working environment for staff and a significantly more professional experience for visitors. All our visitors seem impressed with the refurbished offices, and we were particularly pleased to have received so many staff from overseas oil companies at the second set of Globe workshops.

Staff and corporate identity

Our staff are critical to the development of new ideas, insights and delivery of our products. We have continued to strengthen our team in the last year and are leveraging this through collaborations with universities, other geoscience companies and experienced consultants. The office refurbishment was part of our programme to improve the experience for our staff.

We noted last year that we had undergone a strategic rebranding exercise. The results, which include corporate strategies, styles of working, and personal and corporate values, have now been in place for over a year and are increasingly becoming part of our culture. The new brand style (including the logo), which was one of the products of the exercise, has been very well received and we regularly hear strongly positive views on it.

The future

Getech has continued to invest in developing and extending Globe and now has ten clients signed up to the core Globe framework. As noted above, we have launched the next major stage in Globe which comprises the suite of Earth Systems Models. This is attracting increasing interest and we anticipate it will make a significant contribution in the coming years. Globe is increasingly a framework from which we are leveraging additional business including data sales and proprietary work.

We are particularly pleased by the evidence of strongly increasing demand for our proprietary services, at a range of geographical scales and with a range of clients. It is, in our view, significant that the type of work has extended from being predominantly based on our long-established expertise in gravity and magnetic data interpretation to include a much wider range of skills. Further, we are increasingly working with smaller clients and we anticipate that the contribution from this type of work will increase significantly in the coming years.

We are increasingly working with universities that are well known in their fields to make sure that we can deliver leading-edge solutions to our clients, and with commercial associates who can not only contribute to the delivery of project work but also provide a source of expertise that extends our current skillsets. We believe that these will help to reinforce our technical credibility, extend the range of services we can provide and help underpin our future growth.

Finally, for the second year running we have delivered record trading results and once again I would like to thank all our staff and Board colleagues for their unstinting efforts on behalf of Getech. We believe we have made it a company that people want to work for and our team looks forward to the new challenges that the future years will bring.

Raymond Wolfson
Chief Executive Officer

Consolidated statement of comprehensive income

Notes to the consolidated financial statements

For the year ended 31 July 2013

Nature of operations

The principal activity of Getech Group plc and its subsidiary company Geophysical Exploration Technology Inc. (collectively "Getech" or "the Group") is the provision of gravity and magnetic data, services and geological studies to the petroleum and mining industries to assist in their exploration activities.

General information

Getech Group plc is the Group's ultimate Parent Company ("the Parent Company"). It is incorporated in England and Wales and domiciled in England (CRN: 2891368). The address of its registered office is Convention House, St. Mary's Street, Leeds LS9 7DP. Its principal place of business is Kitson House, Elmete Hall, Elmete Lane, Leeds LS8 2LJ. Getech Group plc shares are admitted to trading on the London Stock Exchange's AIM.

Basis of preparation

These consolidated financial statements ("the financial statements") have been prepared in accordance with International Financial Reporting Standards (IFRS) in issue as adopted by the European Union. IFRS include interpretations issued by the International Financial Reporting Interpretations Committee (IFRIC).

The financial statements have been prepared under the historical cost convention except in relation to financial instruments held at fair value through profit or loss.

The accounting policies have been applied consistently throughout the Group for the purpose of preparation of the financial statements.

The Parent Company financial statements have been prepared using United Kingdom Accounting Standards (United Kingdom Generally Accepted Accounting Practice).

The Directors have instituted regular reviews of trading and cash flow forecasts and have considered the sensitivity of these forecasts to different assumptions about future income and costs. With the improved cash levels and continued prospects for profitable trading, the Directors are fully satisfied that the Group is a going concern and will be able to continue trading for the foreseeable future.

Financial information

The financial information set out above, which was approved by the Board on 28 October 2013, is derived from the full Group accounts for the year ended 31 July 2013 and does not constitute the statutory accounts within the meaning of section 434 of the Companies Act 2006. The Group accounts on which the auditors have given an unqualified report, which does not contain a statement under section 498(2) or (3) of the Companies Act 2006 in respect of the accounts for 2013, will be delivered to the Registrar of Companies in due course.

The statutory accounts for the year ended 31 July 2012 which have been delivered to the Registrar of Companies, contained an unqualified audit report and did not include a statement under s498(2) or s498(3) of the Companies Act 2006.

Dividends

	2013 £	2012 £
Paid during the year		
Final dividend in respect of the year ended 31 July 2012 at 0.8p per share (2011: 0.2p)	234,442	58,474
Interim dividend at 0.4p per share (2012: 0.2p)	117,226	58,475
	351,668	116,949
Proposed after the year end (not recognised as a liability)		
Final dividend in respect of the year ended 31 July 2013 at 1.6p per share (2012: 0.8p)	482,125	233,897

The proposed final dividend for the year ended 31 July 2013 is subject to approval by shareholders at the Annual General Meeting on 10 December 2013.

Earnings per share

Basic earnings per share is calculated by dividing the profit attributable to equity holders of the Group by the weighted average number of the Ordinary Shares in issue in the year.

	2013	2012
Profit attributable to equity holders of the Group	£1,634,612	£930,018
Weighted average number of Ordinary Shares in issue	29,323,481	29,237,151
Basic earnings per share	5.57p	3.18p
Diluted earnings per share	5.30p	2.97p

Diluted earnings per share is calculated by dividing the profit attributable to equity holders of the Group by the weighted average number of the Ordinary Shares which would be in issue if all the options granted, other than those which are anti-dilutive, were exercised. The addition to the weighted number of the Ordinary Shares used in the calculation of diluted earnings per share for the year ended 31 July 2013 is 1,494,138 (2012: 2,040,924). Of the share options granted at 31 July 2013, 600,000 were anti-dilutive because the conditions for exercise had not been met (2012: 529,789).

Notice of Annual General Meeting

The Annual General Meeting of Getech Group plc ("the Company") will be held at Kitson House, Elmete Hall, Elmete Lane, Leeds LS8 2LJ on 10 December 2013 at 12 noon.

24-10-13

Substantial sale of data products

GETECH, the oil services business specialising in the provision of exploration data and geological exploration studies, announces a further sale from its global data library.

The Company is pleased to announce that it has signed a licence agreement for gravity and magnetic data products which will generate gross income of \$864k. Delivery is scheduled to be within the next three months.

Getech's Chief Executive, Raymond Wolfson, commented, "Sales from our global data library continue to be a major part of our business. The gravity and magnetic datasets generate direct income for the Company. However, they are also the foundation for much of our value-added work and therefore underpin a large part of our other business."

Total Voting Rights

For the purposes of the Financial Conduct Authority's Disclosure and Transparency Rules, the total number of ordinary shares in the capital of the Company in issue as at the date of this notice is 30,127,465 with each share carrying the right to one vote.

There are no shares held in treasury.

Therefore, the total number of voting rights in the Company is 30,127,465.

The above figure may be used by shareholders in the Company as the denominator for the calculations by which they will determine if they are required to notify their interest in, or a change to their interest in, the share capital of the Company under the Disclosure and Transparency Rules.

22-07-13

Directors Dealings

The Company has issued 794,681 ordinary shares following the exercise of options by Raymond Wolfson and Paul Markwick, both directors of the Company and by an employee.

Raymond Wolfson exercised options over 540,000 ordinary shares at a price of 20p per Ordinary Share and Paul Markwick exercised options over 229,149 Ordinary Shares of which 19,149 ordinary shares were exercised at a price of 9.87p and 210,000 ordinary shares were exercised at a price of 15p.

The employee exercised options over 25,532 Ordinary Shares.

At the same time, the Company has received notice that Raymond Wolfson has sold 190,000 ordinary shares at a price of 65.5p per ordinary share to cover the cost of the exercise of the options (of which 85,000 ordinary shares were sold on 19 July 2013 and 105,000 Ordinary Shares were sold on 22 July 2013) and that Paul Markwick has sold 80,000 ordinary shares at a price of 65.5p per ordinary shares, for the same reason (of which 65,000 ordinary shares were sold on 19 July 2013 and 15,000 Ordinary Shares were sold on 22 July 2013).

Raymond Wolfson now holds 400,000 ordinary shares representing 1.33% of the issued shares in the Company and Paul Markwick holds 172,553 ordinary shares representing 0.57% of the issued share capital of the Company.

Accordingly, application has been made for 794,681 ordinary shares to be admitted to trading on AIM, and dealings are expected to commence on 26 July 2013.

Following the issue of these new shares, the number of Ordinary Shares in issue will increase to 30,101,117. For the purposes of the Financial Conduct Authority's Disclosure and Transparency Rules ("DTRs"), the issued ordinary share capital of the Company following this allotment consists of 30,101,117 Shares with voting rights attached (one vote per Share). There are no Shares held in treasury. This total voting rights figure may be used by shareholders as the denominator for the calculations by which they will determine whether they are required to notify their interests in, or a change to their interest in, Getech under the DTRs.

Trading Update

GETECH, the oil services business specialising in the provision of exploration data and geological exploration studies, announces a trading update in respect of its year ended 31 July 2013.

On the basis of the strong performance of all parts of the business Getech anticipates that its result for the full year to 31 July 2013 will exceed current market expectations, both in relation to revenue and profits.

Getech's Chief Executive, Raymond Wolfson, commented, "The combination of strong data sales and commitments to Globe has continued to underpin the performance of the Company. Our comprehensive Earth Systems Models, which build on the core of the Globe product, are attracting increasing interest and we are very pleased that demand for our proprietary services continues to strengthen."

Major data sale \$962k

GETECH, the oil services business specialising in the provision of exploration data and geological exploration studies, announces a further sale from its global data library.

The Company is pleased to announce that it has made a further sale of a substantial part of its global magnetic dataset, with a price of \$962k. This dataset has been built over a period of many years and is used by clients to help them identify target areas for their exploration activities by helping them to understand the structure of the earth's subsurface.

Getech's Chief Executive, Raymond Wolfson, commented, "Data sales continue to be both profitable and a strong cash generator for us. This sale is particularly pleasing as it was made to a major independent oil company with global objectives. This client not only bought our global gravity data a number of years ago, but was also the first to sponsor our Globe platform."

Interim Report for the six months ended 31 January 2013

Getech, the petroleum and minerals consultancy specializing in the provision of data and interpretation solutions to exploration teams around the world, announces its interim results for the six months ended 31 January 2013.

Highlights

- Revenue for the six months of £3,967,000 (six months ended 31 January 2012: £3,193,000) representing growth of 24%
- Profit before tax of £1,398,000 (six months ended 31 January 2012: £358,000) representing growth of 290%
- Interim dividend proposed 0.4p per share (2012: 0.2p per share)
- Cash levels strong with gross cash of £5,578,000
- Significant levels of forward committed income
- Strong oil price continues to underpin exploration commitments

Stuart Paton, Non-Executive Chairman of GETECH Group plc, said:

“The first half year has been particularly successful and we look forward to demonstrating continued strong growth on an annual basis. Getech’s results for the full year to July 2013 will, as usual, depend on finalising a number of deals and the precise demand in the remaining months of the year. However, the securing of ten Globe sponsors provides a significant level of committed income for the period to mid 2014. This gives us, for the first time, a greater degree of certainty on our forward-looking financial performance. We hence remain confident about our medium and long-term prospects.”

Chairman's Statement

Results

Getech is pleased to report a Group profit before tax of £1,398,000 (six months ended 31 January 2012: £358,000) after interest receivable of £6,000 (six months ended 31 January 2012: £3,000) on revenue of £3,967,000 (six months ended 31 January 2012: £3,193,000). The post-tax profit was £1,060,000 (six months ended 31 January 2012: £292,000).

The accounts have been prepared under IFRS in issue as adopted by the European Union.

Dividend

Your Board recommends an interim dividend of 0.4p per share.

Business review

Highlights:

- five new Globe sponsors – immediate income from delivery of year one products plus committed income for years two and three;
- major sales of global gravity and magnetic data-sets;
- evidence of Globe leveraging further sales of both geological studies and data;
- first Globe sponsors' meetings a great success; and
- demand for our services strong.

The continued strong performance during this half year has been based on securing further Globe sponsors and major sales of our global gravity and magnetic data-sets, underpinned by the strong oil price. The strong oil price results in E&P companies continuing to increase expenditure on exploration which leads to strengthening demand for our products.

In the last six months, we have secured a further five Globe core sponsors, bringing the total to ten companies. Our Globe sponsors now represent a broad range of E&P companies, based in a number of countries and pursuing different exploration strategies. These new sponsors join the initial three years of our core Globe programme. The first year deliverables are available immediately after signature and the year one income is recognised on delivery of the year one products, leaving committed income for years two and three of the core programme. In the autumn of 2012 we held our first Globe sponsors' meetings in Houston and Leeds. These were very well attended and received by our clients. We believe these forums are an invaluable way of providing face-to-face contact, updating the sponsors on progress and understanding their needs in more detail. As expected, we are also finding that we are securing further sales of geological studies and data through the Globe sponsorship.

In January, we announced two significant sales of our global gravity and magnetic data-sets worth in aggregate \$2m. These sales demonstrate the continued need for E&P companies to access global data-sets, and also the value of the interactions with clients through the Globe work.

We have continued to repay the principal amounts on the loan that we negotiated in 2009 and the combination of profitable trading and advance payments from clients has generated a very strong cash position. At 31 January 2013 the gross cash stood at £5,578,000.

Outlook

We believe that the forecast continuing strong oil prices will underpin future demand for our products. We also anticipate that the strong support for our core Globe programme will lead to sales of ancillary products to these sponsors and provide a catalyst for further companies to commit to this initial period of Globe.

The first half year has been particularly successful and we look forward to demonstrating continued strong growth on an annual basis. Getech's results for the full year to July 2013 will, as usual, depend on finalising a number of deals and the precise demand in the remaining months of the year. However, the securing of ten Globe sponsors provides a significant level of committed income for the period to mid 2014. This gives us, for the first time, a greater degree of certainty on our forward-looking financial performance. We hence remain confident about our medium and long-term prospects.

Dr Stuart Paton

Notes to the interim report

For the six months ended 31 January 2013

1 Nature of operations

The principal activity of Getech Group plc (“the Company”) and its subsidiary company, Geophysical Exploration Technology Inc. (collectively “Getech” or “the Group”) is the provision of gravity and magnetic data, services and geological studies to the petroleum and mining industries to assist in their exploration activities.

2 General information

Getech Group plc is the Group’s ultimate Parent Company. It is incorporated in England and Wales and domiciled in England (CRN: 2891368). The address of its registered office is Convention House, St Mary’s Street, Leeds LS9 7DP. Its principal place of business is Kitson House, Elmete Hall, Elmete Lane, Leeds LS8 2LJ. The Company’s shares are admitted to trading on the London Stock Exchange’s AIM.

The financial information for the six months ended 31 January 2013 and 31 January 2012 has not been audited and does not constitute full financial statements within the meaning of Section 434 of the Companies Act 2006. These consolidated interim financial statements (“the interim financial statements”) have been approved by the Board.

The financial information relating to the year ended 31 July 2012 is based on the Group’s statutory accounts for that period. The statutory accounts were prepared in accordance with International Financial Reporting Standards (IFRS) in issue as adopted by the European Union. IFRS include interpretations issued by the International Financial Reporting Interpretations Committee (IFRIC). The statutory accounts received an unqualified audit report, did not contain statements under Sections 498(2) or (3) of the Companies Act 2006 and have been filed with the Registrar of Companies.

3 Basis of preparation

The interim financial statements are for the six months ended 31 January 2013. They have been prepared using the recognition and measurement principles of IFRS. The interim financial statements do not include all the information required for full annual financial statements and should be read in conjunction with the financial statements of the Group for the year ended 31 July 2012.

The interim financial statements have been prepared under the historical cost convention except in relation to financial instruments held at face value through profit or loss. They have been prepared in accordance with the accounting policies adopted in the last annual financial statements for the year ended 31 July 2012.

The accounting policies have been applied consistently throughout the Group for the purpose of preparation of the interim financial statements.

4 Dividends

	Six months ended 31 January 2013 Unaudited £’000	Six months ended 31 January 2012 Unaudited £’000	Year ended 31 July 2012 Audited £’000
Paid during the period			
At: 0.8p per share (2012: 0.2p per share, year ended 31 July 2012: 0.4p per share)	235	58	116
Proposed after the period end (not recognised as a liability)			
At: 0.4p per share (2012: 0.2p per share, year ended 31 July 2012: 0.8p per share)	117	58	234

The proposed dividend is payable on 17 May 2013 to members on the register at 19 April 2013.

5 Earnings per share

Basic earnings per share is calculated on the basis of the profit for the period after tax, divided by the weighted average number of Ordinary Shares in issue in the period of 29,266,455 (six months ended 31 January 2012: 29,237,151; year ended 31 July 2012: 29,237,151).

Diluted earnings per share is calculated on the basis of the profit for the year after tax, divided by the weighted average number of Ordinary Shares in issue plus the weighted average number of Ordinary Shares which would be issued if all options granted were exercised. The addition to the weighted average number of Ordinary Shares used in the calculation of diluted earnings per share for the six months ended 31 January 2013 is 3,099,028 (six months ended 31 January 2012: 2,088,414; year ended 31 July 2012: 2,040,924). At 31 January 2013 no options in issue were anti-dilutive (31 January 2012: minority of options in issue; 31 July 2012: minority of options in issue).

6 Interim Report

This Interim Report is being sent to the shareholders of Getech and will be available at its registered office, Convention House, St Mary's Street, Leeds LS9 7DP, UK, and from its website, www.getech.com.

Total Voting Rights

For the purposes of the Financial Services Authority's Disclosure and Transparency Rules, the total number of ordinary shares in the capital of the Company in issue as at the date of this notice is 29,306,436 with each share carrying the right to one vote.

There are no shares held in treasury.

Therefore, the total number of voting rights in the Company is 29,306,436.

The above figure may be used by shareholders in the Company as the denominator for the calculations by which they will determine if they are required to notify their interest in, or a change to their interest in, the share capital of the Company under the Disclosure and Transparency Rules.

Trading update

GETECH, the oil services business specialising in the provision of exploration data and geological exploration studies, announces a trading update.

In the five months to December 2012 the Company has announced a number of major contracts including five further Globe sponsors and two substantial sales of its global gravity and magnetic datasets. In light of these contracts, and the committed and likely future sales for the current year, the Company expects to exceed current market expectations for the year to 31 July 2013.

Getech's Chief Executive, Raymond Wolfson, commented, "The first part of our financial year has been extremely successful, with the strong uptake of Globe and continuing strong data sales including two major sales of our global gravity and magnetic data products. As we have stated previously, we are seeing a strong synergy between the sales of Globe and sales of other products and services, and we anticipate that this will continue. We now have forward income, mainly but not solely from Globe, and a prospective sales pipeline that taken together give us confidence that our performance for the year as a whole will exceed expectations."

Major data sales totalling \$2m

GETECH, the oil services business specialising in the provision of exploration data and geological exploration studies, announces two new sales from its global data library.

The Company is pleased to announce that demand for its world class datasets has been enhanced as a consequence of the increased uptake of its *Globe* platform by international oil and gas explorationists. Getech has now secured two significant sales from the global gravity and magnetic datasets that provide the structural support for the *Globe* platform, one priced at \$1,500k and one at \$500k. These two contracts were requested and signed within a matter of days, and required that the data be delivered by the end of December.

Getech's Chief Executive, Raymond Wolfson, commented, "Data sales have historically been both profitable and a strong cash generator for us, and continue to be so. While the underlying demand for our data continues as before, these new contracts are further examples of sales deriving from our marketing of *Globe*. We believe that the increasing uptake of *Globe* will continue to stimulate sales of such related products and services."
